

VERISHIELD™ 100 SERIES PASSIVE EARMUFFS

Solutions They Will Want to Wear

Enhanced hearing protection with optimum comfort,
makes them solutions they will want to wear.

FEATURES

- **Large dimension range:** Comfortably fits a wide range of head sizes
- **Wide cup opening:** Ideal for workers with larger ears, or who wear hearing aids. Opening area of the cup increased by 16% over earlier versions
- **Dielectric headband:** Durable, non-deforming plastic headband, head attachments for electrical environments
- **Lightweight cushioned headband:** Steel-wire construction with padded headband and precision micro adjustments designed for just the right fit around the ear.
- **Memory foam ear cushions:** New unique memory foam that combines denser and softer foam than previous models, for greater comfort and attenuation.

DURABLE CONSTRUCTION

- Steel wire framework
- Non-deforming plastic
- ABS molded with internal baffle design for lighter weight, patent pending
- An oil-resistant cup surface to withstand oily, heavy-work environments and frequent use

AIR FLOW CONTROL TECHNOLOGY (AFC)

All VS100 models feature PIP Global Safety's Air Flow Control technology which offer maximum attenuation without increasing the size or the weight of the earmuffs or the pressure on the head.

The unique combination of the baseplate chamber and high-tech non-woven layer manage the flow of air inside the earmuff to control how sound reaches the ear. The result is better, more consistent overall attenuation for virtually all industrial noise environments.

SOUND MANAGEMENT TECHNOLOGY (SMT)

VeriShield VS100D* models feature Sound Management Technology (SMT) that improves employee safety by blocking harmful noise while allowing voice and signals to be heard more naturally. This advancement allows speech frequencies (articulation index) to be heard with less distortion – reducing worker isolation and overprotection on the job.

*D for Dielectric. The dielectric construction is suitable for all workplaces, especially electrical environments.

PPE INTEGRATION

Offers a variety of head attach options for easy PPE integration: behind the neck, multi-position, and hard-hat attachments that integrate with PIP Global Safety hard hats and face shields

ATTENUATION RATINGS

The attenuation level of each style is marked on the earmuff cup, for quick and easy on-site identification of the level of hearing protection provided.
